Usmael Taju Ahmed

Software Engineer | Full-Stack Engineer | System Architect

+25194 084 8717 | E - m a i l | Github | LinkedIn | Website

PROFESSIONAL SUMMARY

Results-driven Software Engineer specializing in full-stack development with experience designing and building scalable web applications using the MERN and PERN stacks. Passionate about microservices, distributed systems, event-driven architectures, API optimization, and developing secure, high-performance software with clean, maintainable architecture.

TECHNICAL SKILLS

- **Languages**: JavaScript/TypeScript, C++, Java, Dart
- **Frontend:** HTML 5, CSS 3, JavaScript, React.js, Next.js, Tailwind CSS.
- **Backend:** Node.js, Express.js, REST APIs, Microservices, WebSockets, RabbitMQ
- **Databases**: PostgreSQL, MongoDB, MySQL, Redis,
- **Frameworks/Libraries**: Express.js, Flutter, React.js, Nextjs, TailwindCSS
- **Cloud & Storage:** Cloudinary, Supabase, Firebase, Object Storage
- **DevOps & Infrastructure:** Docker, Kubernetes, Nginx, AWS, Render, Railway, Vercel
- **Tools & Platforms**: Git, GitHub, Linux, Postman

PROJECTS

ETechCamp - Learning & Blogging Platform

- Architected a scalable full-stack learning platform for content publishing, community collaboration, and multilingual learning.
- Integrated Google Gemini API for AI-powered Q&A and intelligent content discovery.
- Improved SEO performance by 50% through semantic HTML, structured data, and optimized metadata.
- Increased API performance by 20% through optimized PostgreSQL queries, caching, and efficient routing.
- Implemented secure authentication, RESTful APIs, and database normalization for scalability and data integrity.

WorkBridge - Full-Stack Recruitment Plateform

- Built a scalable microservices-based recruitment platform with secure REST APIs and Docker**.**
- Increased backend performance by 15% using Redis caching and reducing inter-service API calls.
- Reduced service coupling by implementing RabbitMQ for asynchronous microservice communication.
- Improved application security with JWT authentication and Role-Based Access Control (RBAC).
- Optimised media upload and delivery using Cloudinary, reducing storage overhead and improving load times.

EXPERIENCE

EagleLion System Technology **Feb 2025 – May 2025**

Software Engineer Intern *Addis Ababa, Ethiopia*

- Reduced API response time by 20% through Redis caching.
- Reduced unnecessary service-to-service requests by 30% using caching and asynchronous messaging.
- Improved backend scalability by adopting a microservices architecture with RabbitMQ.

EDUCATION

Jimma University **May 2022 – Jun 2027**

B.Sc. in Software Engineering *Jimma, Ethiopia*

LANGUAGE

- English (Fluent).
- Amharic (Fluent).
- Afan Oromo (Native).
